Dear RDH:

Explore the secrets of a healthy smile is the theme of MDHA's celebration of National Dental Hygiene Month (NDHM) in October.

In observance of this month, the members of MDHA would like to focus public attention on the importance of the dental hygienists role in educating patients about establishing good oral health habits at an early age.

With these goals in mind, we are hosting a coloring contest for grades K-3.

We have included a number of oral health facts in order to adequately express the importance of this message. This information will surely make an impact on parents, community leaders and health specialists alike.

Please photocopy and pass out the coloring page to your patients so that we can make this contest a success.

Winners will receive a gift basket full of oral hygiene supplies tailored to their age level along with brushing and flossing instructions from ADHA. They will be notified by mail, and their coloring pages will be placed on our state website. Winners will be announced at this year's House of Delegates which is being held in Grand Rapids from October 22-24th.

Sincerely
Public Relations Council MDHA
