

"A New Era in Periodontal Therapy"

Presented by
Judy Carroll, RDH

Are you ready for significant change in clinical dental hygiene? Outspoken clinical pioneer Judy Carroll, RDH, introduces revolutionary strategies in non-surgical periodontal therapy utilizing several advanced methodologies for more targeted and preventative care long term. Learn an entirely new approach to periodontal endoscopy, systematic piezo root instrumentation, host modulated therapy, regenerative proteins, salivary diagnostics, and integrative care through multidisciplinary approach. Raise the bar in your recognition and understanding of periodontal pathogenesis by learning what hidden risk factors you are overlooking every day in clinical practice. Take a peek into the future of a new standard with a demonstration of many "hopeless" cases treated by utilizing advanced *synergistic and integrative treatment strategies*. Numerous practical applications and nuggets will be presented in this course to help attendees enhance their overall periodontal therapy program while substantially increasing production and career satisfaction. This course will help redefine the dental hygienists scope of practice and significant role in co-therapy. Experience a break through in century old beliefs and limitations! It's time for *A New Era in Periodontal Therapy* with a new era of dental hygienists.
